

Hyundai Warcotec

Rediscover fresh air indoor The air your family deserves

Features & Benefits

Micro Particle Filtration

Excellent Nano silver HEPA filter which can effectively remove the micro dusts in indoors

Deodorization

By adapting the 2 steps carbon urethane filter, the removal performances of various smells are highly enhanced

Antibiotic

The antibiotic function is added to pre-filter, so, the propagation of common germs and molds which exist in dusts of indoor air is prevented through 4 steps of filtration

Patented low noise technology

Increased ventilation with high wind power and low noise - patented technology SIROCOPAN.

Automatic sensor

By sensing a pollution level, can sense the conditions of pollution through the real-time sensor. With auto-operation system, air purifier will automatically control airflow

9 Steps Purification

Excellent air cleaning capabilities through 9 Steps filtration

Energy Efficient

Low 30W energy consumption translate to less than the cost of a cuppa coffe when switched on for 24 hours for a month

Multi Speed Setting

"Low" for clean air maintenance, "High" & "Turbo" mode for fast & effective air cleaning

Sleep

Equipped with "Sleep" mode for quietness & low energy consumption

Semi Permanent Ionizer

Anion (Negative Ions) attach and breaks down bacteria, keeping allergen & germs at bay

1 Prefilter

Prefilter firstly is consisted of the antibiotic material and removes the large dusts(5um) like the hairs, dusts from quilts, animal's hairs etc.

2 Static Electricity Sheet

Static Electricity sheet is consisted of antibiotic material and do first remove thick dusts, Yellow sand, Home dusts and ticks etc.

3 Antibiotic medium filter

Antibiotic medium filter is consisted of antibiotic material and do secondly removes thick Dusts, Yellow sand, Home dust etc.

4 Nano Silver Composite HEPA filter

Nano Silver Composite HEPA filter has high air filtration and sterilization power. This filter removes the minute dusts of the 0.3 um like pollens, bacteria, cloud of smoke etc.up to 99.97% and has germicidal powers.

5 Carbon Urethane Form Deodorization Filter

Carbon Urethane Form Deodorization Filter firstly removes the strong smells like awful ones of fats and food.

6 Carbon Antibiotic Sheet

The removal efficiency of the smell and the antibiotic functions are enhanced.

7 Granular Active Carbon Deodorization Filter

Granular Active Carbon Deodorization Filter removes the smokes and the substances making awful smells by Granular Activated Carbon.

8 Carbon Urethane Form Deodorization Filter

Carbon Urethane Form Deodorization Filter secondly removes the light smells, Formaldehyde and Carbon monoxide.

9 Ion Generator

By generating the Ion into indoor's air, the unit makes a user feel

Specification

Hyundai Air Purifier HYAP-201 Red

Voltage / Frequency
220V AC/50Hz

Speed Setting
Low, High, Turbo

Power consumption
30W

Noise Level
43.1Db (maximum operation)

Air flow rate
3.6m³/min

Recommended coverage
70sqm (753sqft)

Operating method
Multiple (filter + electronic type)

Weight
10kg

Dimensions
440 x 250 x 780mm (W x D x H)
